PROSPECTUS OF THE "NATIONAL MON-UMENT.

A weekly journal to be published in Washington, under the sanction of the Washington National Monument Society.

Monument Society.

JAMES C. PICKETT, Epiron and Publishers.

The Monument is intended to be a literary, agricultural, and misseilaneous paper. It will contain selections of the literature of the day—the best that can be found in American and English publications: interesting scientific articles, embracing mechanics; foreign and domestic news; a synopsis of the proceedings of Congress, and every thing that such a journal might be expected to contain, with the exception of party politics, which will be at all times most rigorously excluded.

The Monument will be published for the express and the sole purpose of aiding in the erection of the noble column new rising on the banks of the Fotomac, in honor of the Father of his Country, and which every one who venerates the name of Washington would rejoice to see completed. After deducting out of the subscription the expenses of the journal proposed to be published, the remaining funds will be faithfully applied, and without reserve, to the purpose indicated. The aid, therefore, of all who are willing to contribute to so patriotic an object, and one so entirely national, is earnestly requested. By subscribing to the Monument, a valuable journal at a low price may be obtained, while it will be doing something, at the same time, towards completing that majestic memorial of the Nation's gratitude.

The Board of Managers recommend Mr. Pickett, formerly Fourth Auditor of the Treasury and Chargéd'taffairs to Peru, who proposes to edit and publish the Monument journal, as one well qualified to perform the ditties of editor, and to conduct the paper faithfully, and satisfactorily to the subscripters. They assure their fellow-citizens that this enterprise is not as speculation got up for individual emolument. Mr. Pickett will make the experiment with his own means and at his own risk; if successful, he will receive nothing more, and he sake nothing more, than a very moderate compensation for his services. Not one dollar, therefore, of the direct subscription to the erection of

journal it is proposed to publish, it may be stated that a list of fifty thousand paying subscribers, at two dollars each, will yield an annual net profit of from fifty to sixty thousand dollars.

The postmasters, and secretaries of all organized bodies throughout the Union, are respectfully requested to act as agents in obtaining subscriptions, thus adding the great object of our exertions.

As all editors and publishers, on account of the object for which the Monument newspaper will be established, must wish it to succeed, it is hoped that they will contribute to its success by publishing this prospectus.

All moneys will be remitted, and all letters and moneys addressed prepaid, to the general agent of the Monument Society, [Mon. Elisha Whittlessy, Washington.

OFFICERS.—Millard Fillmore, ex-officio President; Arch. Henderson, First Vice President; Walter Lenux, (Mayor of Washington.) Second Vice President; Thos. Carbery, Third Vice President; J. B. H. Smith, Treasurer; Geo. Watterston, Secretary.

BOARD OF MANAGERS.—Winfield Scott, N. Towson, Thos. Munroe, W. A. Bradley, P. R. Fendall, Walter Jones, Thomas Blagden, Peter Force, W. W. Seaton, M. F. Maury, T. Hartley Crawford, Benj. Ogle Tayloe, Elisha Whittlessy, Terms.—The Monument of the enterprise not admitting of any sheet—the paper and type being of the best quality—and in quarte form, containing sixteen large pages, that it may be more easily preserved. The price will be two dollars per annum, payable on the receipt of the second number. The nature of the enterprise not admitting of any credit, none can be given.

Societies and clubs will be furnished with the Monument on the following terms: 3 copies for \$5; 5 copies, \$8; 10 copies, \$15; &c.

Those who are disposed to patronise the Monument are requested to forward their names to the General Agent, without delay. The first number will be published early in May, and the second on the second day of August, and

without delay. The first number will be published early in May, and the second on the second day of August, and weekly thereafter; time being allowed for the Prospectus to be circulated, and for the agents to make returns. As all subscribers will be contributors to the Monument itself, their names will be published in the paper.

Austin's Magic Freezer,
Through in siz minutes. For the preparation of
Ice Creams, Water Ices, &c.—Patented Sep-

Ice Creams, Water Ices, &c.—Patented September 19, 1848.

THE distinguising merits of this Apparatus are—
1st. The astonishing rapidity of the process, surpassing belief—hence the name.
2d. The Cream during the progress of freezing becomes charged with atmospheric air, by which it nearly doubles in bulk, and obtains that peculiar smoothness, lightness, and delicacy of flavor, for which the Ice Cream of our best Confectioners is so highly prized.
3d. It does not require a tenth part of the labor that the common Freezer does.
4th. It does not require a tenth part of the labor that the common research does.
4th. It does not require a tenth part of the labor that the common repeals him by any other mode.
5th. There is a considerable saving in ice, as the tub needs no replenishing during the operation.
The annexed testimonial from the Proprietor of the Eutaw House will put to rest all doubt.
"Having witnessed the process of freezing Ice Cream in Austin's Magic Freezer, two quarts of Cream having been frozen in the incredible short time of six minutes, I cheerfully recommend it to the public."

"This is to certify, that during the summer of 1848, 1 used one of Austin's Patent liee Uream Freezers of the largest size, (10 gallons,) making from 10 to 50 gallons per day during the season; and so far as-regards expedition and power, I consider it decidedly the best freezer now in use, as I have had with it no difficulty in making ten gallons of superior quality Ice Cream from five of plain Cream, in thirty minutes from the time I commenced working it.

with the hearing and the programmer of study study and the pography.

6th. A Trachine's Department. The course of study will consist of a judicious selection of subjects from the other departments, including all the branches pursued in our common schools. Practical Lectures will also be given on School Teaching, both as a science and as an art.

Pupils will not only thus receive the fullest instruction relative to the best and most popular methods of teaching, but they will also have opportunities of exemplifying them, by hearing recliations in the lower departments of the Institution.

7th. A Department of Modern Landuage. In which students who wish to take a thorough course can have an opportunity of doing ac; while others, whose object may be to acquire sufficient knowledge to translate with facility, and to promounce with tolerable correctness, in as short a time as possible, are also provided for.

By a late re-organization of this department of Delaware College, the Board of Trustees have taken measures to place it upon a new and improved foundation, and to endow it with advantages possessed by few similar institutions in the country. The Academy, heretofore merged in the College, and of course subjected to all the critis which have been found to attend the amalgamation of the two departments in the same building, and under the same government, now enjoys the privilege of a separate establishment, without losing those which result from its relation to the College proper.

A large and elegant edifice, with all, the necessary fixtures of a complete boarding establishment, has been erected and furnished, in which the students of the Academy hoard, under the immediate charge of the Principal and his Assistants; and all its exercises are conducted on a system of its own, uninterrupted by the interests or operations of the other department. The furniture of the study rooms and dermitories has been chosen with peauliar reference to comfort and convenience for study cand no expense has been spared in providing the apparatus necessary to render the means of instruction complete; giving to Newark Academy facilities for preced study and comfortable accommedation of students, fully equal to those afforded by many of our colleges.

From its intimate relation to the College, students of the Academy enjoy many advantages not generally obtained at institutions of this kind. These who wish to

the College as can be profitably enjoyed by academical students.

The charge for Boarding, Washing, Fuel, Light, &c., with tuition in the English, Latin, and Greek, is asventy dollars for the Summer Session, and seventy five for the Winter Session. The only extras are one dollar per session for insidential supremer, and a fee of eight dollars for Modern Languages, and a fee of five dollars for Drawing, from these who states these classes. The sessions and #sections of the Fraperators Department are the same, is those of the College.

Rev. MATTHEW MERGS, A. R. President of Delaware College.

WILMINGTON BOARDING SCHOOL FOR BOYS.—The institution waitusted in VV FOR BOYS.—This instruction is situated in one of the healthlest parts of the city of Winnington, entirely beyond the settled portions of the town. The uniform healthfulness of the location may be unferred from the fact that, since the setablishment of the school, about twenty-sight years, very few cases of serious indisposition have occurred among the pupils, and not a single destinate parts, or from thesess contracted while here.

The course of instruction includes besides the ordinary angulab branches, Natural Philosophy, Chessistry, Physicology, History, Rhetoric, the various branches of Alathematics, and the Listin, Grock, and Fronch Languages. Particular attention is paid to the higher Mathematics and ology, History, Rhetoric, the various branches of Mathematics, and the Latin, Grock, and French Languages. Particular attention is paid to the higher Mathematics and their application to Mechanics and Ehrimeoring; the latter and Surveying are taught practically by field operations, with the use of appropriate instruments. Lectures on Natural Philosophy and Chemistry, in which all the important principles are illustrated by experiments, are regularly delivered before the students.

As the object is to make the instruction as thorough and practical as possible, no expense has been spared in providing suitable apparatus. It is believed that, in this respect, the Institution will compare favorably with any similar one in the country. A carefully selected library of more than one thousand volumes, containing works on the various branches of Literature and Science, farmishes ample reading matter, while a Laboratory, fully supplied with apparatus and tests, contains all that is necessary for practical instruction in Chemical Manipulation.

The school, year communeed on the third Second day (atoutsy) of the Ninth month, (September,) and is divided into four quarters of eleven weeks each; leaving a vacation of two months, from about the middle of the Seventh month (Nuly).

THE TESTIMONY OF ONE OF OUR LAWYERS—
Mr. JAS. L. HAMILTON—DEAR SR: Although the number and respectability of the testimonials of whigh you are already in possession, as to the efficacy of your Medicine, "THE GREAT VA. REMEDY," in the diseases which it's designed to cure, are sufficient, in my opinion, to establish its reputation, and secure for it such patronage as will assigned to cure, are sufficient, in my opinion, to establish its reputation, and secure for it such patronage as will assigned to cure, are sufficient, in my opinion, to establish its reputation, and secure for it such patronage as will assigned to the end of the contribute, for such use as you may think proper to make of it; this formal acknowledgment of its samitary struces My own case was Dyspepsia of long duration, and very aggravated in its character, manifested by an almost total destruction of the digestive functions, great debility, nervousness, emaciation, and impaired appetitic, with pain and a burning sensation in the left side of the chest, palpitation of the heart, vertige and congestion in the head, and many other symptoms indicative of the worst type of the disease, by the use of these or four bottles of your preparation, been entirely relieved. The cases of my friends in which your Medicine was taken, were Dyspepsia, Chronic Headache, and Sove Throat, in all of which it proved efficacious, after the trial of a vast number of other remedies without benefit. Your medicine is as pleasant to the teste as a contial, and in my experience corrects all derangement of the stomach, restores the wasted or enfeabled energies of the digestive organs, and impairs strength and reanimation to the whole system.

Very respectfully, yours, &c.,

JOSEPH STORY.

Gentlemen: Your letter of the 24th has been received, in which you ask my opinion as to the value of the English Exchequer Reports, from Price downwards to the time, to an American Leayer, and as to the expediency of reprinting them in this country. Of the high value of these Reports, both on the Pleas and Equity sides of the Court, I have not the least doubt—the decisions of this Court for the last fifteen or twenty years, both at Equity and in Common Law, being entitled to equal respect with any others in England. I should think an American Lawyer's Library essentially incomplete without them.

I am, gentlemen, very respectfully yours,

FURNISHING MAIL LOCKS AND KEYS.

POST OFFICE DEPARTMENT,
March 14, 1851.

It being desirable to substitute locks and keys of some other kind for those now in use for the mail service of the United States, specimen locks and keys, with proposals to farnish the same, will be received and considered at the Post Office Department until the first day of July next. The different locks will be submitted to a commission for examination and report. Upon this report, contracts will, as soon as practicable, be entered into for furnishing such locks and keys for four years, with the right on the rest, of the Postmaster General, for the time being. nishing such locks and keys for four years, with the right on the part of the Postmaster General, for the time being to extend and continue the contract in force for an addi-tional term of four years, by giving to the contractor-written notice to that effect, not more than nine nor less than six months before the termination of the first term

tional term of four years, by giving to the contractor a written notice to that offect, not more than nine nor less than six months before the termination of the first term of four years.

With a view of procuring the best lock at the lowest price, no kind of look is preseribed as a standard, the Department relying for a selection on the mechanical skill and ingenuity which a fair competition, now invited, may develop. It is, however, proper to state that a lock suit able for the mail service should possess the following qual ities, viz: durability, uniformity, lightness, and strength. For the purpose of displacing simultaneously all themal locks and keys now in use, about thirty thousand new locks and twenty thousand keysadapted thereto will be required to be furnished by the contractor within seven months after the contract shall have been entered into afterwards the annual supply will depend on the durability of the locks and keys adopted, as well as the increase of the mail service; but it will probably never exceed in amount three thousand of the former and onthousand of the latter.

No lock will be considered if it be like any already in general use; nor will any one with whom the contract may be made be allowed to make, sell, or furnish, any lock or key similar to those contracted for for any other purpose or use than that of the Post Office Department. The kind of lock adopted must be patented, and the patentee will be required, on entering intocontract, to make an assignment of his patent for the exclusive use and benefit of the Department, if the Postmaster General shall deem such requirement essential to the interests of the service. In case of the failure of the contractor, and hen efficiently in the sum of thirty thousand the right besides a resort to the penal remedy hereinafter mentioned, to annul said contract, and to contract anew with any other party or parties as he may see fit, for furnishing aimilar locks and keys.

Trom distinguished statemen:

Letter from the Hon. Henry Clay.

Assurant, 20th July, 1849.

Dear Sir: I wish to express to you the gratification I derived on receiving the July number of the Merchants' Magazine and Commercial Review, from viewing your portrait in the beginning, and from reading your address to your friends at the end of it. When we feel under obligations to those who have contributed to our information and amusement, we are naturally desirous to possess all the knowledge of them, of their appearance, of the leatures of their rountenance, and of the character and habits of their mind, which we can acquire. You have placed your numerous readers (at least you have me, if I may not speak for them) under those obligations; and the number of your valuable work now before me, in some degree, satisfies the deeire to which I have alluded.

I have become quite familiar with the Magazine and Review, and have no hesitation in expressing my humble opinion that it is eminently entitled to the public regard and support. It collects and arranges, in good order, a large amount of valuable statistical and other information, nighly useful not only to the merchant, but to the statesman, to the cultivator of the earth, to the marniner, in short, to all classes of the business and reading community.

Entertaining this opinion, I am glad that it has been, and hope that it may continue to be, liberally patronized.

Offering you cordinl assurances of my esteem and regard, I am truly your friend and obedient servant.

Freeman Hunt, esq.

Extract of a letter from Hon. Millard Pillmore.

"I have read it (Merchants' Magazine) with a good leal of attention, and have no hesitation in saying that I hink it one of the most valuable periodicals that was ver published. To the merchant it seems quite indisensable, and to the statesman and man of general information almost equally desirable. It is a grand repetitory of useful facts and information, which can be found nowhere so well digested and so accessible as in these numbers.

where so well digested and so accessible as in these numbers. I only regret that I do not own the whole work."

Letter from the Hon. Thomas H. Benton.

Washington City, April 20, 1849.

Mr. Freeman Hunt.—Sir: I owe you many thanks for the opportunities I have had to read the Merchante' Magazine, and have found it in reality to be a magazine, and that well replenished, of all the useful matter which the title would imply, and presented with a fullness and clearness which delights while it instructs. It is, in fact, a merchants' magazine in the large acceptation of the term—merchants who go between nations, whose large operations bring many departments of knowledge, and a view of the state of the world, into daily requisition. Lut it is not the great merchant only, but the one of more undest, but, nevertheless, of most useful operations—the merchant of the interor also—who will find this magazine to abound with the information the pursuit of his business and the elevation of the merchante character requires. Nor is its utility at all confined to merchants, but extends to the legislator and diplomatist, and to all who are charged with managing the affairs of the nation. For myself, I have found it most useful to me in my senatorial labors, and have been in the habit for many years of carefully consulting it.

Very respectfully, sir, your obedient servant,

THOMAS H. BENTON.

Letter from Hon. Wm. H. Seward. My Dear Sir: Have the goodness to place my name on your list of subscribers for the Merchants Magazine. I regard it as an invaluable work for the use of all who would understand not merely commercial operations in this extending country, but the fiscal and commercial questions involved in the administration of the government.

ment.
I am, with great respect, your humble servant,
Freeman Hunt, esq. WILLIAM H. SEWARD.

WISZ & BROTHER, Mannascurers of Bondoir, Grand, and Square Pianos, request those who would be assured of a first class Piano, one that ladies can perform on with the greatest possible advantage—one that the tourn an be instantly adjusted to the exact strength of the fineers and movement of music, one that will stand in concert tune, one that the tone will not become shrill and rating, that is chaste of style and elegantly made up of straight and regular curve lines, that will last an age—to dive them a call. The ancient standing of the Baltimore Factory, and liberal patronage of citizens and others of the first order of artistic taste and science, conceded at once the most efficial, have been fully anticipated. Their recently flaished Grand Piano, minutely reviewed by the most excomplished civil engineers and master artists, has been denominated truly a Grand Piano; also, that their late Bondoir, for style, power, and compasse of tone, is not surpassed, if equalled, in the world. Friends and customers, please stop in and examine for yourselves.

THIS NEW AND SPLENDID ESTABLISHMENT for

THIS NEW AND SPLENDID ESTABLISHMENT for the scientific treatment of the various diseases with which the human system is afflicted, is situated about three miles from the city of Buffalo, in a rural spot, and so accessible from all points as to be reached without inconvenience or delay.

A line of omnibuses runs from the steamboat landings in Buffalo to the springs every ten minutes.

The house and grounds are near the extensive and beautiful green-houses and nurseries of the Mesars. Hodges & Bryants; and the scenery in all directions is unsurpassed, as regards either variety or beauty; embracing points of view, from which may be taken in at a glance the broad expanse of Lake Erie, the Niagara flowing majestically towards the Falls, extensive forests, and the "Queen City of the Lakes," with its moving paparama of steamboats and ceaseless enterprise.

"Queen City of the Lakes," with its moving parerama of steamboats and ceaseless enterprise.

The water, taken immediately from the celebrated "Cold Spring," is unsurpassed as regards coldness and purity, by any in the United States. The house, recently erected at a cost of about seven thousand dollars, has been fitted up in a next and elegant style, at considerable extra expense, and is sufficiently capacious to accommodate seventy-five patients. Connected with the establishment, and constituting one of its attractions, are the fixtures and conveniences for inaccent and healthful gymnastic exercises.

MEDICAL DEPARTMENT.

MEDICAL DEPARTMENT.

The institution is under the general supervision of S. M. Davis, M. D., Professor of the Theory and Practice of Vedicine in Central Medical College, and Geo. W. Davis, M. D., formerly of Dansville, N. Y., the resident physician, and is permanently associated with the before mentioned gentleman as counsel, and associate of the medical board of control. And the Friends of the establishment deem it a matter of felicitation that the services of Miss Mary M. Taylor, a lady of high medical sitainments, who has attended two courses of lectures in the Central Medical College, have been secured, and that female patients can at any time avail themselves of her invaluable sid and counsel.

The steward's department is under the control of significant eminently qualified for that position; and unweated pains will be taken to have every thing apperiating to the establishment arranged on a plan, and conducted in a way, to ensure the comfort, and promote the health and happiness of all who may wish to avail themselves of its benefits. Baths of all descriptions, adapted to the cure of the various forms of disease, and constructed on a scale not inferior to those of any other establishment in this country.

An enlightened public sentiment has everywhere repu-

of the various forms of disease, and constructed on a scale not inferior to those of any other establishment in this country.

An enlightened public sentiment has everywhere repudiated a reckless use of drugs in the treatment of disease; while intolerable sufferings and broken constitutions have imperatively demanded "Reform." A return from a wide and fatal departure from the simplicity of Nature's laws is called for, alike by a rational love of happiness and the deplorable exigencies of our condition. Hydropathy, or a scientific use of water as a restorative and curative agent, is a practical substitution of a simple and remarkably efficacious mode of curing the sick; for that system of drugging, depleting, and cautterising, which, in obtaining the mastery over disease, too frequently places the patient beyond the reach of further annoyance. The success of the various Water Cure establishment in this country, to say nothing of any other, has fully confirmed the hopes of the carly discoverers and promulgators of the great truths upon which the system is founded, and renders verbal communications unnecessary. It is deemed sufficient to say, that the "Cold Spring Water Cure" will compare favorably with any of the well-conducted establishments of a similar charactor, and will be found equal to the best, as regards the order, convanience, and desirableness of its arrangements. The institution is now open for the reception of patients, and in full operation.

TERMS.

For board, medical advice, attendance and nursing, &c., from \$7 to \$14 per week, payable weekly, varying according to the room and attention required. Each patient will be required to furnish two lines sheets, two cotton comforters, one woollen blonket, and four towels; or, where it is not convanient for the patient to furnish them as above, they can be supplied at the establishment by paying fifty cents a week.
